## NORTHWELL HEALTH

---

I am a Physician Assistant Student graduating in January 2023 from CUNY York College, and I am interested in beginning my career as an Internal Medicine PA at Northwell Health.

As you will see from my resume, my PA training has included a variety of areas in medicine, including Internal Medicine. I completed my Internal Medicine rotation at North Shore University Hospital which provided me valuable experiences of working collaboratively with different departments within the hospital and becoming familiar with how their facility was organized.

As I have progressed through my PA training, I have realized that I would like to work in a field that would best develop my medical knowledge and skills as a provider. I also wanted to work in a field that will allow me to interact with different specialties and would challenge me to become a better provider for my patients. I believe that I would be a good candidate for this position because not only am I a quick and eager learner, but I will work diligently to fulfill the responsibilities expected of me within this facility. I am a strong team player and am capable of thinking critically and quickly and working collaboratively to solve patient-problems that may come my way. I have also developed strong patient communication skills and have excellent bedside manner, which is essential in providing patient-centered care.

I welcome the opportunity to discuss with you my qualifications and future career possibilities! Thank you for your consideration and for reviewing my application. Please feel free to contact me using the contact information provided. I look forward to speaking with you soon!

Sincerely,  
Keziah Babu, PA-S
